Professional Summary

Junior Front-End Developer with hands-on experience building responsive, production-quality web applications using React, TypeScript, JavaScript (ES6+), and Next.js. Skilled at translating Figma designs into clean, reusable interfaces using Vite, with strong command of REST API integration, component architecture, and state management. Experienced in unit and component testing with Vitest and React Testing Library (RTL) to ensure code reliability and maintainability, as demonstrated in projects such as Langora. Proficient in Git version control and responsive, cross-device UI development. Prior professional experience in a fast-paced, deadline-driven environment built strong time management, multitasking, and prioritization skills that translate directly to team-based development workflows. Seeking a Junior Front-End Developer role to apply these skills and grow within a product-focused engineering team.

Projects

- **Langora** (Next.js, TypeScript, React Hook Form, Zod) Developed a modern language-learning application with user authentication, language & proficiency selection, and a dashboard for vocabulary management. Implemented robust form validation using React Hook Form + Zod, built a clean responsive UI, and structured the app with reusable components for scalable growth. Added unit and component tests using Vitest and React Testing Library (RTL) for form validation, authentication flows, and key UI components to ensure reliability.
- **Weather App** (React, TypeScript, Vite, REST API) Built a real-time weather application that fetches data from the Open-Meteo API with automatic geocoding. Designed a modular architecture separating API logic from UI, added proper error handling for invalid cities, and delivered a fully responsive interface with dynamic weather icons and detailed conditions.
- **PawGallery** (React, TypeScript, REST API, CSS Grid) Created a responsive dog breed explorer powered by TheDogAPI. Implemented search and filter functionality, dynamic data rendering, and a clean component-based architecture with a fully adaptive CSS Grid layout for all screen sizes.

Front-End Development Training & Personal Projects (2024 – Present)

- Completed an intensive, self-directed learning path in modern front-end development after transitioning from a non-technical career.
- Built and deployed multiple front-end applications using React, TypeScript, Next.js, and Tailwind CSS to practice real-world development patterns.
- Developed practical skills in responsive design, REST API integration, component-based architecture, state management, and version control (Git).

Work Experience

Sales Accounting Specialist — Import-Export Company, Tehran (2018 – 2024)

- Managed sales accounts, invoicing, and production coordination simultaneously with high accuracy in a deadline-driven environment
- Developed strong time management, task prioritization, creativity, and responsibility — now applied to structured front-end development work

Education

Bachelor's Degree in Information Technology

Islamic Azad University, South Tehran Branch | 2013 – 2018

Skills

Languages & Frameworks: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling & UI: Tailwind CSS, Responsive Design, CSS Grid/Flexbox, Figma-to-Code, Sass/SCSS

Tools & Libraries: React Hook Form, Zod, Vite, REST API, Git/GitHub

Testing: Vitest, React Testing Library (RTL), Jest-DOM

Other: Component Architecture, State Management, Context API, Error Handling
